Continued strong return on investment

Returns substantially exceed weighted average cost of capital

- RoI now at 14% and rebuilding following dilution from NationsRent
- Average RoI since April 2004 of 12.2% significantly ahead of Group's pre-tax weighted average cost of capital of c.8%

RoI is defined as the ratio of operating profit before amortisation and exceptionals to net operating assets, including goodwill. Debt and deferred tax are excluded.

Earnings per share

	<u>Before</u> <u>NationsRent</u> <u>2005/6</u> £m	<u>The year of</u> <u>acquisition</u> <u>2006/7</u> £m	<u>With</u> <u>NationsRent</u> <u>2007/8</u> £m
Profit before tax	67.5	81.4	122.9

Earnings per share	<u>11.3p</u>	<u>10.3p</u>	<u>14.8p</u>

- 2007/8 EPS of 14.8p compares to 11.3p in the year to April 2006 (pre Nations)
- Compound annual growth in earnings is therefore 14% per annum over the two years
- At constant exchange rates the two year CAGR is 20% per annum

Taxation – cash tax payments likely to remain low

- Accounts tax charge of £39m (2007 - £26m) remains stable at 35% of underlying profit
- Cash tax charge remains low at just £6m (5%) due to:
 - Utilisation of acquired NationsRent tax losses
 - Utilisation of UK deferred tax asset - £42m asset in 2007 reduced to £20m in 2008
 - US bonus depreciation introduced in 2008
- Looking forward, cash tax payments are set to remain low due to:
 - Continuing effect of US bonus depreciation
 - Tax planning measures
 - Continuing utilisation of UK deferred tax asset

Technology disposal

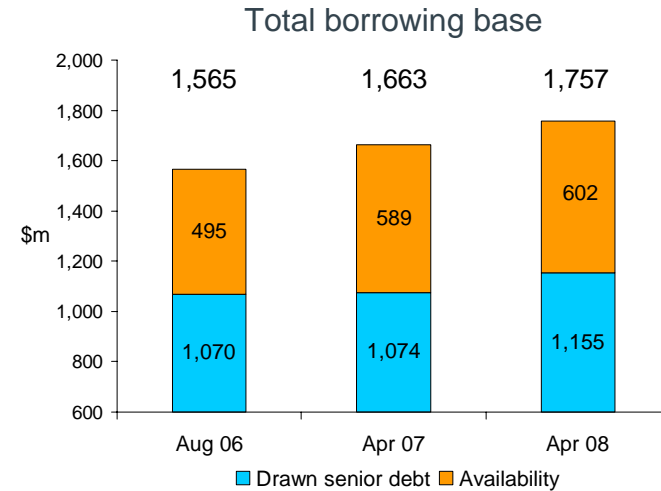

- Sale of Ashtead Technology for £96m announced on 23 June
- Disposal price represents 5.9 times 2008 EBITDA and 9.1 times 2008 operating profit
- Disposal price also represents 25% of our equity market capitalisation for a business which contributed just 4% of our 2008 EBITDA
- Proceeds to be received in cash and will be applied to pay down debt
- Disposal focuses the Group on its core businesses, Sunbelt and A-Plant, whilst lowering outstanding debt
- After costs and cash tax on disposal net cash proceeds expected to be £85/90m
- For accounting purposes, an exceptional profit on disposal of approximately £70m will be recognised in Q1 2008/9

Strong cash flow with significant investment in fleet de-ageing and growth

	<u>2007</u> £m	<u>2008</u> £m	<u>Growth</u> %

Purchase of own shares	(5)	(24)	
Exceptionals and other	(69)	(10)	
Increase in total debt	(239)	(35)	

- Enlarged Group continues to convert c95% of EBITDA into cash
- Net 2007/8 capex of £258m compares with 2008/9 guidance of £175m. Interest and tax will also reduce in 2008/9 reflecting lower interest rates and the Technology sale

Capital structure and net debt

- Net debt at year end was £963m reflecting heavy investment in fleet de-ageing and growth
- Net debt to EBITDA leverage, however, has reduced significantly since closing of the NationsRent acquisition and is now in the middle of our 2-3 times target range
- Availability under the ABL totals \$602m providing substantial assurance that all our debt will remain effectively covenant free
- Debt committed for 5 years on average with our first significant maturity being August 2011
- With the Technology disposal and anticipated operating cash generation, by April 2009 we are targeting net debt of £785m* (2008 - £963m) and to be towards the lower end of our 2-3 times net debt to EBITDA range (2008 – 2.5 times)
